Team Development Programs

Foster more cohesive, collaborative, and high-performing teams.

Overview

Give your team the tools to work together more effectively with OPM's Team Development Programs. Strengthen and empower your individual team members with targeted assessments to help them better understand themselves and others. Improve overall dynamics and effectiveness with guided post-assessment development webinars that build trust, enhance communication, leverage strengths, foster collaboration, and improve conflict resolution.

What to Expect

Choose one or more assessments based on your team's specific needs. After completing the assessment, each team member receives an individualized report to gain a clearer picture of leadership strengths and areas for development. Our credentialed, expert faculty members design and facilitate a four-hour webinar with curriculum tailored for the team as a whole. Through focused discussion and recommendations, your team will be ready to take immediate actions that improve performance. And procurement is easy - all assessment programs are within the government's micro-purchase authority.

Current Assessments

- Emotional Intelligence
- Four Lenses™
- Everything DiSC® - Catalyst
- Immunity to Change™
- CliftonStrengths®
